

About OCP Group

About OCP Group

Created in 1920 and transformed into a corporation governed by Moroccan law in 2008, OCP is a global leader in the entire value chain of the phosphate industry and has access to the largest reserves in the world. It provides a wide range of well-adapted fertilizer products to enhance soil, increase agricultural yields, and help feeding the planet in a sustainable and affordable way. It employs a direct workforce of over 21,000 employees and is engaged with a number of affiliates and joint ventures in Morocco and internationally. It substantially contributes, with its mining and industrial facilities and through its different programs and projects, to the development of the regions where it operates.
