

Innovation and sustainable development

Innovation and sustainable development

Innovation and sustainable development, a guiding principle in the growth strategy of Phosboucraa

Central to its growth strategy, Phosboucraa's commitment to innovation and sustainable development is articulated around 3 main components:

PROTECTING THE ENVIRONMENT

INNOVATION

➤ DEVELOPMENT OF **INNOVATIVE INDUSTRIAL PROCESSES** ALLOWING FOR THE PRODUCTION OF **VALUABLE BY-PRODUCTS** SUCH AS FLUORINE.

ENERGY EFFICIENCY

➤ UTILIZATION OF **HEAT RECOVERY SYSTEMS** TO PRODUCE **CLEAN ELECTRICITY**.

➤ **REDUCTION OF ENERGY CONSUMPTION** FOR THE DRYING OF PHOSPHATE ROCK PRIOR TO ITS EXPORT (REDUCTION OF **50 000 TONS OF CO₂ EQ.** DURING DRYING).

WATER PRESERVATION

➤ UTILIZATION OF **SEAWATER** DURING THE **WASHING AND FLOTATION** PHASES.

➤ PRODUCTION OF **POTABLE WATER** VIA **DESALINATION** OF SEA WATER, ALLOWING FOR INDUSTRIAL PROCESSES TO TAKE PLACE WITHOUT RESORTING TO **CONVENTIONAL** SOURCES OF WATER.
